Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1651

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/23/03 has been entered.

Claims 2-8 and 10 are being considered on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 2-~~3~~ and 10 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims are directed to a process requiring nuclease or alkali hydrolysis to obtain polyamines in an amount 2-3.2 times the amount of polyamines obtained in the absence of this hydrolysis step. In addition, claim 5 requires a certain concentration of the alkali. Yet none of the examples are directed to the actual use of alkali hydrolysis. The examples do show an increase of yields of 2-3.2 times the amount of polyamine. But the only reagent used in the samples is "sodium hydrate", which is not a recognized alkali.

Therefore, the claims as written lack a proper written description and fail to provide a find proper enabling disclosure for one of ordinary skill in the art to make and use the invention as claimed.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1651

Claims 2-8 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 is vague and indefinite in the recitation of "subjecting said yeast somatic components to a decomposition step comprising nuclease digestion or alkali hydrolysis of increasing the yield". It appears that a clause is omitted in this sentence, such as an indication of the time period of digestion or hydrolysis. In addition, a space is missing between "alkali" and "hydrolysis". The term "alkali hydrolysis" does not appear to be a term of art.

Claim 10 is further vague and indefinite in that the phrase "said decomposed components" fails to find proper internal antecedent basis. It is recommended that the phrase be substituted with a clause such as: "the decomposed yeast somatic components produced".

Therefore the rejection is deemed proper and it is adhered to.

No claim is allowed.
